PROFINET - Wachendorff Automation

PROFIBUS Slave), and PROFINET Supervisor (corresponds to PROFIBUS Master Class 2). PROFINET is a platform with which the various sections of a plant or machine can be integrated into the automation landscape via an explicitly defined interface for communication and, in the future, for bus-powered devices in specific applications.

PROFINET - The Solution Platform for Process Automation

It supports serial signal levels up to 57kbit/s. One Anybus Communicator is needed to connect one field device with an RS-232 interface to Profinet, while up to 31 automation devices using RS-485 interface can be connected via one Communicator to Profinet. The Anybus Communicator contains an integrated Web server for setting and monitoring of data.
