BS EN 13892-2:2002 - Methods of test for screed materials ...

EN 13892-3:2014 - This European Standard specifies a method for determining the wear resistance of moulded specimens made from cementitious screed material, primarily for hard aggregate wearing screed materials or optionally for other screed materials. The method is also suitable for specimens cut from floor screed. This method is unsuitable for synthetic resin screed materials.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2003, and conflicting national ...

EN 13892-5:2003 - Methods of test for screed materials ...

Abrasion resistance is an important performance requirement in warehouse and industrial floors. Floors can be exposed to quite aggressive actions from trucks and other equipment. Tests are carried out using our purpose designed and built equipment which conforms to the requirements of BS EN 13892-4: 2002. Known as the BCA abrasion test machine, the floor surface is assessed by measuring the ...
