The AERA Technical Committee offers the following information regarding broken exhaust manifold bolts on 1999-2005 Ford 5.4L VIN L engines. This information applies to non-supercharged Ford truck engines. Generally, this condition is first noticed because of excessive exhaust noise that is the result of a manifold leak.

Tech Tip: Broken Exhaust Manifold Bolts on 5.4L Engines
Top quality German made CSP type 4 inlet manifolds - machined to match DRLA & IDF 40 carburetors. Low profile - only 95mm tall from centre of engine ports. Engine builders recommend these manifolds for 40mm carburetors over the standard oversize type, claiming you can increase power by 5-10% Supplied as a pair with:-
