database administration in the Oracle Grid Infrastructure environment. Learn how to administer cluster databases and study the new connection architecture.

Oracle Database 11g: RAC Administration

Oracle Database 11g Release 2 introduced several new parameters. The parameter of interest for our discussion is PARALLEL_DEGREE_POLICY. The default value of this parameter is MANUAL. Changing this to AUTO causes Oracle RAC to spawn slaves across multiple instances, when possible, to execute this query without the need of parallel query hints.
